DUPLICATE

PROVISIONAL SPECIFICATION.

"Foul Breath Indicator".

I, XAVIER HENRY LEDER The Seamens' Institute, Well Street London, E.— by profession a Seaman do hereby declare the nature of this invention to be as follows:—

It is a toilet article; It is an appliance in the shape of a tube, made of any non-absorbent material and curved so as to transmit without any obstruction the breath from the mouth to the nostrils.—It terminates in two orifices, relatively proportioned and sufficiently large to permit the partial insertion of the mouth into the lower—and the nose into the upper orifice.

Dated this 18th day of July 1902.

XAVIER H. LEDER.

COMPLETE SPECIFICATION.

"Foul Breath Indicator"

I, XAVIER HENRY LEDER, of The Seamans Institute, Well Street, London, by profession a Seaman, do hereby declare the nature of this invention and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement:—

My invention has for its object a toilet article to enable persons to test their breath. The drawing is a view showing the invention in use.

It consists of a curved tube A, the ends B, C, whereof are preferably flared as shown to enable the mouth of the user to be partially inserted into one end B, and the nose into the other end C.

By breathing from the mouth through the tube any foulness or unpleasant state of the breath may be readily detected by the sense of smell.

The article may be made of any suitable non-absorbent material such as celluloid, silver, or glass, for example.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is:

1. A foul breath indicator which consists of a curved tube preferably having flared ends, substantially as described and shown.

Dated this 15 day of September 1902.

CHAS. COVENTRY, C.E.,
Patent Expert, Agent for the Applicant.
